

# How to Fix QuickBooks Error Code 195? Toll Free Number- 1800-213- 6058

## What is QuickBooks Error Code 195?

- QuickBooks Error Code 195 is an error that occurs when there is a problem with the configuration settings or when there is an issue with the network connection between the QuickBooks database server and the client computer. This error is usually associated with the QuickBooks Point of Sale software and can occur when trying to open a company file or perform certain actions within the software.

To resolve this error, you can try the following steps:

1 Check your internet connection and ensure that you have a stable network connection.

2 Update QuickBooks to the latest version to ensure that you have the latest bug fixes and patches.

3.Ensure that your firewall and antivirus software are not blocking QuickBooks from accessing the internet.

4.Reboot your computer and try opening QuickBooks again.

5.If the issue persists, contact QuickBooks technical support for further assistance.

It's also worth noting that QuickBooks Error Code 195 can be caused by a variety of factors, and the above steps may not work in all cases. If you are unsure of how to proceed, it is recommended that you seek professional assistance from a QuickBooks expert.

## How to Fix QuickBooks Error Code 195?

- QuickBooks Error Code 195 can be fixed by following these steps:
  1. Verify the Internet Connection: Make sure that your internet connection is working properly and is stable. Check if there is any issue with the network that is causing the error.
  2. Update QuickBooks to the Latest Version: Check if there is any update available for QuickBooks. If an update is available, install it to ensure that you have the latest bug fixes and patches.
  3. Check Firewall Settings: Your firewall may be blocking QuickBooks from accessing the internet. Check your firewall settings and ensure that QuickBooks has the necessary permissions to access the internet.
  4. Disable Antivirus: Your antivirus software may also be blocking QuickBooks from accessing the internet. Disable your antivirus temporarily and check if QuickBooks is working properly.

5. Restart QuickBooks Database Server Manager: If you are using QuickBooks Point of Sale, restart the QuickBooks Database Server Manager to fix the error.

6. Repair QuickBooks: If none of the above steps work, repair QuickBooks by following these steps:

1. Close QuickBooks and go to Control Panel > Programs and Features.
2. Find QuickBooks in the list of installed programs and select it.
3. Click on the Repair button and follow the on-screen instructions to repair QuickBooks.

7. Contact QuickBooks Technical Support: If none of the above steps work, contact QuickBooks technical support for further assistance. They will help you to diagnose and fix the issue.

If you are not comfortable performing these steps on your own, it is recommended to seek the help of a professional QuickBooks expert to fix the error.
